RESOLUTION

NO. R-18-314

CITY HALL: July 26, 2018

BY: COUNCILMEMBERS GISLESON PALMER AND WILLIAMS

RESOLUTION

A RESOLUTION TO SUPPORT A DATA-DRIVEN AND EQUITY-FOCUSED COMPLETE STREETS POLICY IN THE CITY OF NEW ORLEANS

WHEREAS, this resolution expresses the New Orleans City Council’s determination that the City of New Orleans’ Complete Streets policy creates a comprehensive, integrated, and connected transportation network that balances access, mobility, health and safety needs for all residents, enabling all people in New Orleans to walk, bike, drive, and ride transit safely and affordably; to do so utilizing a system of performance measures that ensures equitable access to transportation options; to promote economic development; to reduce the number of crashes and improve public safety; to foster more livable communities; to encourage healthy lifestyles; to improve air quality; to create accessible and efficient connections between home, school, work, recreation, places of worship, and retail destinations; to promote geographic, socio-economic, and health equity; and to develop a balanced ecology in our roadways for the sustainability and resilience of our communities; and

WHEREAS, Complete Streets may include amenities and facilities including but not limited to pedestrian safety improvements like sidewalks, crosswalks, curb extensions, and pedestrian signals; protected bike lanes, other low-stress bikeways, and bike parking facilities; transit shelters, signage, and improved pedestrian and bicycle access to transit stops and stations; Americans with Disabilities Act (ADA) accessible curb ramps and transit stops; traffic calming treatments like roundabouts and smaller lane widths; trees, landscaping, street lighting, and street furniture; and rain gardens, drains/sewerage facilities, pervious surfaces, and other stormwater management features; and

WHEREAS, the City’s current Complete Streets Policy (CAO Policy Memorandum #134) addresses some of the above, and an update is needed to ensure implementation based on community needs and participation. This update should address the following policy goals:

1. Safety -- Reduce hazards and prioritize safety, including during construction or repair work, for all people traveling in the public right of way, especially vulnerable people including persons with disabilities, children, seniors, people walking, and people bicycling;

2. Connectivity -- Increase the interconnectivity of walking, bicycling, transit, and freight transportation networks to create a comprehensive, efficient, and integrated regional system;
3. Evaluation -- Regular evaluation and reporting of performance measures including but not limited to ridership, equity, safety, health outcomes, project selection, community participation, resilience, and hours of staff training;

4. Multi-Modal Accommodation – In planning, design, construction, maintenance, and operation, give full consideration to accommodation of all people, be they people who walk, people who bike, people who use transit, people who drive cars, or people who operate public transportation, emergency vehicles, and commercial goods to ensure that the public right of way is accessible to all people, including children, seniors, and people with disabilities;

5. Livable Communities -- Foster livable communities and increase public health through vibrant, active, comfortable streetscapes that complement land use and economic development and encourage less driving and more walking, bicycling, and transit use. Prioritize mixed-used, transit-oriented development that takes into consideration the cultural context of the existing community to help guarantee affordable housing and a lack of displacement;

6. Equity -- Ensure equitable funding and implementation of Complete Streets projects by engaging with residents, locally owned businesses, schools, and organizations, including neighborhood associations and nonprofit agencies, in each community. Prioritize reliable transit infrastructure in low income neighborhoods, communities of color, and areas where people lack access to personal vehicles in order to connect all residents with jobs, nutritional foods, and social services;

7. Sustainability and Resiliency -- Create a balanced street ecology through the use of green infrastructure including bio-swales, surface retention, pervious surfaces, planting trees, and other practices referred to in the Urban Water Plan;

8. Economic Development -- Increase job access and workforce development by increasing affordable mobility options while improving retail performance and spurring private investment adjacent to Complete Streets. Assist new retail and private investment projects to comply with the Complete Streets approach; and

9. Coordination -- Coordinate and communicate between stakeholders and other community members about the Complete Streets Program objectives and metrics; and

WHEREAS, the Council supports the City of New Orleans undertaking the following steps to ensure successful implementation of Complete Streets:

1. Establishing oversight of the implementation of Complete Streets policy through a Complete Streets committee, which should include members of various constituencies, such as the City Council, City Planning Commission, Department of Public Works, Sewerage and Water Board, New Orleans Police Department, New Orleans Fire Department, Regional Transit Authority, Louisiana Department of Transportation & Development, as well as representatives from walking, bicycling, disabled, youth and
senior communities and any other organizations as deemed relevant. This committee should meet regularly and provide a written report twice annually to the Mayor and Chair of the City Council Transportation Committee evaluating progress and advising on implementation;

2. Maintaining a comprehensive inventory of the walking and bicycling infrastructure throughout New Orleans and prioritizing projects to eliminate gaps in walking and bicycling networks;

3. Reevaluating capital improvement and maintenance project prioritization annually to encourage implementation of walking and bicycling infrastructure;

4. Incorporating Complete Street principles into the comprehensive plan, zoning code and other plans and manuals, rules, regulations and programs, including the Urban Water Plan and Safe Routes to School program;

5. Implementing and maintaining a Walking and Bicycling Transportation Plan and a Street Tree and Landscape Plan;

6. Training all pertinent City staff on the content of Complete Streets principles and best practices for implementing the policy;

7. Utilizing inter-departmental project coordination to promote the most responsible and efficient use of fiscal resources for activities that occur within the public right of way;

8. Creating and adopting a Complete Streets Design Manual to support implementation of this policy; and

9. Actively seeking sources of appropriate funding to implement Complete Streets; and

WHEREAS, it is the intent of this policy to foster partnerships with city and state agencies, citizens, businesses, advocacy groups, and neighborhoods to implement Complete Streets; and

WHEREAS, a strong Complete Streets policy will allow more opportunities to receive funding for local Complete Streets projects from federal and state sources, based on the current federal and state criteria for funding projects; and

WHEREAS, the City of New Orleans should develop and adopt departmental policies, design criteria, standards and guidelines based upon recognized best practices in street design, construction and operations including but not limited to the latest editions of American Association of State Highway Transportation Officials (AASHTO) Guide for Planning, Designing, and Operating Pedestrian Facilities; AASHTO Guide for the Development of Bicycle Facilities; Institute of Transportation Engineers (ITE) Designing Walkable Urban Thoroughfares: A Context Sensitive Approach; National Association of City Transportation
WHEREAS, the implementation of Complete Streets policy shall reflect the context and character of New Orleans neighborhoods’ built and natural environments while enhancing the appearance of such. The City of New Orleans shall consider methods of providing development flexibility within safe design parameters such as context-sensitive design solutions and shall attempt to employ all solutions consistent with and sensitive to the context of the project; NOW, THEREFORE

BE IT RESOLVED, That the New Orleans City Council hereby supports an update to the City of New Orleans Complete Streets Policy (Memorandum #134) based on the principles enumerated above and seeks their implementation at the earliest practicable time.
